Index to Volume XXXVI

Page citations are made to single pages; these are often the beginning of a chapter, section, or running discussion dealing with a topic.

Ability grouping and related issues: 419
Achievement, correlates of: 290; intellectual, 290; nonintellectual, 291
Adolescence — behavior disorders and guidance: 474; group guidance, 481; individual counseling and psychotherapy, 474
Adolescence, comparative studies of: 453; cultural contact, 453; cultural variations in attitudes, 455; physical development, 456; socialization practices, 454
Adolescence, cross-cultural studies of: 457; initiation rites, 457
Adolescence—cultural deprivation, poverty, and the dropout: 463; (*see* Culturally deprived adolescent students)
Adolescence, intelligence in: 411
Adolescence, intracultural studies of: 450; marriage and sex education, 452; youth agencies, 451; youth culture, 450
Adolescence: motivational, attitudinal, and personality factors: 437; research methodology, 438
Adolescence in other cultures: 450
Adolescent reference groups: 445; adolescent in age-mate groups, 446; youth subcultures and adolescent motivation, 445
Adolescent reference groups, locales of: 427; college and university, 430; high school, 429; street-corner societies, 427
Adolescent, social background and context of the: 439; concerns of youth, 439; cross-cultural differences in personality and attitudes, 440; family background, 442; goals for success, 443; socioeconomic level and associated attitudinal differences, 441
Adolescent society: 424
Adult intervention: 432
Anxiety during testing: 292
Aphasia, adult: 67
Appraisal function: 288; anxiety, 292; appraisal of interest, 293; correlates of achievement, 290; creativity, 293; interpretations of test scores, 288; test scoring and answer sheets, 288
Articulation disorders: 56; articulation as related to auditory and motor abilities, 57; articulation as related to oral function and structure, 57; testing, 56
Audiologic assessment: 178; auditory function in infancy, 178; differential diagnosis and the neurologically impaired, 180; identification audiometry, 179; objective measurement, 178; other audiometric procedures, 179; other handicapped groups, 180

Bayesian statistics (*see* Statistics, Bayesian)
Behavior, observation and recording of: 529; collection of observational data, 532; observational techniques, 529
Behaviors, acquisition of new: 279
Braille reading and writing: 84

CAI languages: 592; AUTHOR, 594; BASIC, 594; CATO, 592; CLASS, 594; Coursewriter I, 593; Coursewriter II, 593; Lisp, 593; MAT, 593; Mentor, 593; SYLLOGEN, 594; Telecomp, 593; THOR, 594
Canonical correlation: 608
Cerebral palsy and other neuromuscular disorders: 64
Cleft palate: 65; incidence, 65; surgery in relation to speech hearing problems, 66; velopharyngeal adequacy and speech proficiency, 66
Cognitive development in adolescence: 403; determinants of the transition, 408; educational implications of the transition from concrete to abstract cognitive functioning, 409; general and specific aspects of the transition, 407; intelligence in adolescence, 411; transition from concrete to formal operations, 403; validity of the stage concept, 405
Communality problem: 556
Component and common-factor scores, the computation and estimation of: 573
Computer assistance with the educational process: 588
Computer-assisted instruction: 588; existing CAI languages, 592; existing CAI

Index to Volume XXXVI

Ability grouping and related issues: 419
Achievement, correlates of: 290; intellectual, 290; nonintellectual, 291
Adolescence — behavior disorders and guidance: 474; group guidance, 481; individual counseling and psychotherapy, 474
Adolescence, comparative studies of: 453; cultural contact, 453; cultural variations in attitudes, 455; physical development, 456; socialization practices, 454
Adolescence, cross-cultural studies of: 457; initiation rites, 457
Adolescence—cultural deprivation, poverty, and the dropout: 463; (*see* Culturally deprived adolescent students)
Adolescence, intelligence in: 411
Adolescence, intracultural studies of: 450; marriage and sex education, 452; youth agencies, 451; youth culture, 450
Adolescence: motivational, attitudinal, and personality factors: 437; research methodology, 438
Adolescence in other cultures: 450
Adolescent reference groups: 445; adolescent in age-mate groups, 446; youth subcultures and adolescent motivation, 445
Adolescent reference groups, locales of: 427; college and university, 430; high school, 429; street-corner societies, 427
Adolescent, social background and context of the: 439; concerns of youth, 439; cross-cultural differences in personality and attitudes, 440; family background, 442; goals for success, 443; socioeconomic level and associated attitudinal differences, 441
Adolescent society: 424
Adult intervention: 432
Anxiety during testing: 292
Aphasia, adult: 67
Appraisal function: 288; anxiety, 292; appraisal of interest, 293; correlates of achievement, 290; creativity, 293; interpretations of test scores, 288; test scoring and answer sheets, 288
Articulation disorders: 56; articulation as related to auditory and motor abilities, 57; articulation as related to oral function and structure, 57; testing, 56
Audiologic assessment: 178; auditory function in infancy, 178; differential diagnosis and the neurologically impaired, 180; identification audiometry, 179; objective measurement, 178; other audiometric procedures, 179; other handicapped groups, 180

Bayesian statistics (*see* Statistics, Bayesian)
Behavior, observation and recording of: 529; collection of observational data, 532; observational techniques, 529
Behaviors, acquisition of new: 279
Braille reading and writing: 84

CAI languages: 592; AUTHOR, 594; BASIC, 594; CATO, 592; CLASS, 594; Coursewriter I, 593; Coursewriter II, 593; Lisp, 593; MAT, 593; Mentor, 593; SYLLOGEN, 594; Telecomp, 593; THOR, 594
Canonical correlation: 608
Cerebral palsy and other neuromuscular disorders: 64
Cleft palate: 65; incidence, 65; surgery in relation to speech hearing problems, 66; velopharyngeal adequacy and speech proficiency, 66
Cognitive development in adolescence: 403; determinants of the transition, 408; educational implications of the transition from concrete to abstract cognitive functioning, 409; general and specific aspects of the transition, 407; intelligence in adolescence, 411; transition from concrete to formal operations, 403; validity of the stage concept, 405
Communality problem: 556
Component and common-factor scores, the computation and estimation of: 573
Computer assistance with the educational process: 588
Computer-assisted instruction: 588; existing CAI languages, 592; existing CAI

systems, 591; general CAI language characteristics, 591; student-subject matter interphase, 590; theoretical orientations for CAI, 589
Computer-assisted instruction, applications of: 594; drill and practice, 595; testing, 595; tutoring, 596
Computer-assisted research: 597; computer simulation models, 599; processing of natural language, 599; psychological experimentation, 600; quantitative instructional models, 597
Computer procedures in multivariate analysis: 613
Consultation: 282
Counseling, descriptive and evaluative studies of: 267; behavioral model, 268; counselor models, 267; dynamic model, 268; milieu model, 269; procedural models, 267
Counseling, for the development of insight: 275; changes in attitude, 277; improvement of academic performance, 275; individual processes, 278
Counseling, group procedures in: 274; acquisition of new behaviors, 279; acquisition of occupational and educational information, 282; evaluation of comparative procedures, 284; improvement of accuracy in self-appraisal, 281
Counseling, individual; and psychotherapy: 474; comparative studies of individual and group counseling, 479; developmental characteristics and appropriate therapy, 477; psychotherapy with adolescents, 477; research report differences, 474; styles of counseling research, 475
Counseling process and function: 264; counseling process, 266; projection, 270
Counselor function: 264; empirical sources, 265; intuitive sources, 264
Counselors and their preparation: 256; characteristics of counselors, 257; preparation of counselors, 259; role of the counselor, 256; selection of counselors, 258; supervision of counseling, 258
Covariance structures, analysis of: 610
Creativity, appraisal of: 293
Crippled (*see* Physically handicapped)
Culturally deprived: aspirations of, 320; curriculum for, 343; as a field of special education, 155; guidance of, 316; intellectual performances of, 317; intelligence of, 51; intelligence and achievement, 417; language, 418; programs for, 321; school staff members and, 319; social environment of, 52; special programs for, 417; talent and, 51; teaching materials for, 383
Culturally deprived adolescent students: characteristics of, 465; educational programs for, 468; identification of, 464; process and irreversibility, 467; variation among, 466
Curriculum, the changing: 343; advances in technology, 345; curriculum theory, 349; knowledge explosion, 348; social, economic, and demographic forces, 343
Curriculum, criticisms of conceptual schemes in the planning of: 366; models and theory making, 366; structural relationships from discipline to discipline, 366
Curriculum development and experimentation: 353; English language arts, K-12, 354; foreign languages, 357; mathematics and science, 357; new emphases, 353; social studies, K-12, 356
Curriculum and method, issues in: 420; creative and critical thinking, 421; discovery learning, 420
Curriculum, political influences on: 346; governmental programs, 346; interest groups, 348
Curriculum theory and research: 367; effects of new educational pressures on curriculum development, 390; evaluation of new curricula, 368; knowledge and content, 362; knowledge, disciplines, and structure, 362; methodology: research vs. evaluation, 391; need for precision, 389; objectives of research, 389; research and evaluation, 388; revisionary character of knowledge, 367; role of curriculum research, 388; theory, research, and practice, 369

Deaf and hard of hearing: 176; audiologic assessment, 178; personal, social, and vocational studies of, 191; vocational status of, 192
Deaf and hard of hearing, communication of the: 184; auditory training, 186; hearing aids, 187; language behavior, 188; speech, 184; speechreading, 186
Deaf and hard of hearing, educational research on the: 189; achievement, 189; language learning, 190; programed instruction, 190

Deaf and hard of hearing, psychological studies of the: 181; cognitive functions, 182; intelligence testing, 181
Deafness and hearing difficulty: etiology, 177; incidence and causes, 176; pathologies and genetic factors, 177
Design and analysis methodology: 491; experimental design, 491; interpretation of statistical inference, 498; methods of statistical inference, 495
Discriminant analysis and MANOVA, relationship between: 608
Discriminant function: 607
Distribution theory: 508
Distributions, prior: 506

Emotionally and socially handicapped: 120; teacher education, 129; theory and needed research, 129
Emotionally and socially handicapped, identification and characteristics of: 121; case findings and predictive measures, 122; incidence, 121; school achievement of, 124; social and psychological correlates, 123
Emotionally and socially handicapped, provisions and outcomes of education for: 125; long-term effects of school-related treatment, 128; organization and administration, 125; teaching methods and classroom operation, 126
English language arts, K-12; development of curriculum for: 354
Experimental design: 491; general design methodology, 493; incomplete designs, 494

Factor analytic methodology: 566; communality problem, 566; computation and estimation of component and common-factor scores, 573; estimation of communalities (fig. 1), 580; new books and journals, 581; new psychometric models, 575; other developments, 577; prospects, 583; relating factor solutions, 571; rotation problem, 570; trends in the application of factor analysis, 579
Foreign languages, development of curriculum for: 357

Gifted: 37; curriculum for, 47; as a field of special education, 156; identification and definition of, 37; others' perceptions of, 48; talent and the culturally disadvantaged, 51
Gifted, characteristics of: 39; attitude and personality, 40; learning, 39; sex differences, 42
Gifted, program adjustments for: 43; acceleration, 44; counseling and careers, 47; grading and prediction, 46; grouping, 43; independent study and honors, 45; teacher training, 46
Gifted, underachievement of: 48; family influences on, 49; intervention, 50
Group guidance: 481
Guidance, campus environments as a factor in: 233; institutions and student bodies, 235; needs and press, 233
Guidance, differential role expectations in: 248; role of student affair workers, 248; role of students and student organizations, 249
Guidance, elementary and secondary school programs for: 219; issues related to coordination of pupil personnel services, 228; organization and administration of pupil personnel services, 219; roles and functions of pupil personnel workers, 222
Guidance, higher education programs for: 233; advising, 244; discipline, 247; orientation programs, 243; residences, 244; students, 236
Guidance of students with special characteristics: 308; culturally deprived students, 316; specialty-oriented students, 314; superior students, 308
Guidance theory: analysis of the present state, 213; emerging substantive premises, 210; established atheoretical premises, 208; foundations: philosophy, 209; original theory, 210; related theory, 212; teacher role, 210; theoretical formulations and related research, 207; theory and guidance, 208; trends and emphases, 213

Handicapped: deaf and hard of hearing, 176; emotionally and socially, 120; mentally retarded, 5; multiply, 86; physically, 162; speech, 56; visually, 75
Hearing aids: 187
Hypothesis testing: 512

Instructional problems and issues: 414; ability grouping and related issues, 419; general education for all students, 416; issues in curriculum and method, 420; special programs for the disadvantaged,

417; vocational vs. general education, 414
Instructional systems concept: 374
Interest, appraisal of: 293

Knowledge, disciplines, and structure: 362; content and process, 365; definitions and descriptions, 362; problem of relationship and synthesis, 363
Knowledge explosion: 348

Language development, delayed speech and: 58
Laryngectomy: 60
Learning, components of a systems approach to: 374; administrative problems, 377; instructional methodology, 377; learner characteristics, 375; resource characteristics, 375; teacher characteristics, 376
Learning disorders: 93; classifications, 97; issues and needed research, 113; terminology and incidence, 94
Learning disorders, characteristics of children with: 100; emotional disturbance, 102; neurological studies, 103
Learning disorders, diagnostic testing of: 106; multifactor diagnostic tests for remedial planning, 108; multifactor predictive tests, 106; single-factor predictive tests, 107; single-factor tests for remedial planning, 109
Learning disorders, etiology of: 98; brain damage or dysfunction, 99; cerebral dominance, 98; maturational lag theory, 99; multifactor and other theories, 99; reviews, 98
Learning disorders, literature concerning: 95; philosophy and miscellaneous, 96; reading disabilities, 95; visuomotor disabilities, 96
Learning disorders, remediation of: 110; perceptual training, 110; philosophy of remediation, 113; remedial reading, 112; studies with follow-up data, 110
Learning materials and their implementation: 373; components of a systems approach to learning, 374; instructional systems concept, 374

MANOVA, development of: 606
MANOVA and discriminant analysis, relationship between: 608
Mathematics and science, development of curriculum for: 357
Media, new developments in: 384; films and television, 384; programed instruction, 385; tapes, 385
Mentally retarded: 5; as a field of special education, 156; issues, trends, and recommendations, 28; psychological foundations of special education for, 16; speech and language disorders of, 63; structure of intelligence of, 6
Mentally retarded, education of: 10; anxiety in the classroom, 14; methods, 13; social factors in school adjustments, 15; special classes for, 10
Mentally retarded, evaluation of: 6; achievement tests, 9; adaptive behavior, 9; intelligence tests, 7; personality tests, 10; short tests of intelligence, 8
Methodology — research vs. evaluation: 391; domains of curriculum research, 393; evaluation as medial assessment, 392
Multiply handicapped: 86
Multivariate analysis: 604; analysis of covariance structures, 610; applications of multivariate analysis in research, 612; canonical correlation, 608; computer procedures, 613; development of multivariate analysis of variance (MANOVA), 606; discriminant function, 607; multivariate analysis in the repeated measures design, 609; other work, 611; relationships between MANOVA and discriminant analysis, 608

Nonparametric statistics (*see* Statistics, nonparametric)

Observational data, collection of: 532; behavior units, 540; classification of category systems, 532; classification of representative observation systems (fig. 1), 533; descriptive vs. evaluative categories, 535; discrete and continuous categories, 539; effects of conditions on observational data, 545; exclusiveness and inclusiveness, 537; expressive and instrumental aspects of behavior, 534; intensity and the crucial act, 539; laboratory and field research, 547; levels of observational categories, 534; the observer, 543; reliability and validity, 547; sampling, 541; schema showing various foci of observer's point of reference (fig. 2), 543; structured and unstructured observations, 532; verbal

behavior as the basis of observational categories, 542
Observational techniques: 529; nonparticipant observer, 530; participant observer, 529
Occupational and educational information, acquisition of by counselors: 282
Occupations, psychosocial studies of: 299
Operations, transition from concrete to formal: 403; determinants of, 408; educational implications of, 409; general and specific aspects of, 407; validity of the stage concept, 405

Physically handicapped: 162; adjustment of, 167; attitudes of, 169; curriculum and instruction for, 170; diagnosis and assessment of, 165; as a field of special education, 157
Physically handicapped, identification of: 162; general health, 162; incidence, 164; prematurity, 163; tuberculin screening, 162
Probability theory: applications to sampling and census survey methods: 554
Programmatic research: 327; evaluation of programs, 327; long-range complex programmatic research, 329
Pupil personnel, roles and functions of in elementary and secondary schools: 222; mental health team approaches, 227; psychological and social work services, 226; role and function of the elementary school counselor, 225; role and function of the secondary school counselor, 222
Pupil personnel services, administration and organization of: 219; counselor assignments, 220; counselor-student ratios, 221; data-processing equipment, 221
Pupil personnel services, issues related to the coordination of: 228

Repeated measures design, multivariate analysis in the: 609
Residences: 244; organization and staffing of, 244; program effects, 245; residence type and student achievement, 246; student-residence congruence, 246
Rotation problem: 570; analytical oblique rotation, 570; analytical orthogonal rotation, 570; other developments in factor rotation, 571

Sample surveys, census vs.: 552
Self-appraisal, improvement of accuracy in: 281
Social studies, K-12; development of curriculum for: 356
Socially handicapped (*see* Emotionally and socially handicapped)
Special education: organization, administration, and supervision of: 134; federal administrative structure, 138; instructional program and its supervision, 142; local administrative structure, 140; modification in programs and procedures, 141; needed research, 145; personnel, 144; state administrative structure, 139
Special education, preparation of personnel for: 151; advanced graduate preparation, 154; methodological considerations, 152; teacher preparation, 153
Special education, psychological foundations of: 16; concept formation, 24; discrimination learning, 19; incidental learning, 23; learning, 19; learning sets, 22; motor responses, 18; operant conditioning, 23; paired-associates learning, 20; perceptual processes, 16; personality and self-concept, 26; probability learning, 23; social factors, 27; stimulus trace, 21; transfer, 22
Special education, rationale for programs in: 135; comparative special education, 137; public policy, 135; scope and characteristics of special education groups, 136; statistics on need and services, 135
Special education, vocational fields in: 154; culturally deprived, 155; deaf, 154; gifted, 156; mentally retarded, 156; physically handicapped, 157; socially and emotionally maladjusted, 157; speech handicapped, 158
Speech handicapped: 56; adult aphasia, 67; articulation disorders, 56; cerebral palsy and other neuromuscular disorders, 64; cleft palate, 65; delayed speech and language development, 58; as a field of special education, 158; laryngectomy, 60; speech and language disorders of the mentally retarded, 63; stuttering, 61; voice disorders, 59
Speechreading: 186
Stage concept, validity of the: 405
Statistical inference, interpretation of: 498

Statistical inference, methods of: 495; estimation, 495; hypothesis testing, 496; miscellaneous studies, 497
Statistical study, conducting the: 556; analysis of data, 562; data collecting, 558; data processing, 561; data storage and retrieval, 562; field work organization, 561; population or universe to be studied, 557; sample selection, 560; selection of sampling unit, 559; small pilot study, 561; statement of objectives, 556; survey measurement methods to be employed, 558
Statistics, Bayesian: 503; Bayesian view of some old problems, 511; distribution theory, 508; hypothesis testing, 512; miscellany, 513; philosophical background, 503; prior distributions, 506
Statistics, nonparametric; developments in: 519; *k*-sample statistics, 520; miscellaneous studies, 524; ordered hypotheses, 522; powers, 520; simple calculation methods, 519; tables, 523; two-sample cases, 521; Wilcoxon analyses, 523
Statistics, nonparametric; textbook treatment of: 517
Students of higher education: 236; characteristics and change, 238; fraternity members, 241; junior college, 239; married students, 242; subcultures and college goals, 236; women leaders, 241; women's roles, 240
Students, specialty-oriented: 314
Students, superior: 308; descriptive studies, 308; intellective characteristics, 309; nonintellective characteristics, 311; special programs, 313
Stuttering: 61; etiology of, 62; measurement of stuttering behavior, 61; therapy for, 62
Survey designs in education, sample type —focus on administrative utilization: 552; census vs. sample surveys, 552; conducting the statistical study, 556; probability theory: application to sampling and census survey methods, 554

Teaching materials and their implementation: 380
Teaching materials, printed: 380; for the culturally disadvantaged, 383; curriculum guides, 381; educational and curriculum reform, 382
Test scores, interpretation of: 288; constancy of the IQ, 289; influence of cultural variables, 289
Test scoring and answer sheets: 288

Variance, development of multivariate analysis of (MANOVA): 606
Visually handicapped, education of: 82; Braille reading and writing, 84; listening, 83; mathematics, 86; mobility, 86; sight utilization, 85
Visually handicapped, general aspects of: 75; identification and definition, 77; medical aspects, 78; technological research, 79
Visually handicapped, psychological aspects of: 80; abstract functioning and concept development, 82; attitudes, 80; tests and appraisal, 80
Vocational choice and counseling: 303
Vocational development: 298; meaning of work, 301; psychosocial studies of occupations, 299; theoretical formulations, 298
Vocational vs. general education: 414; general education for all students, 416; out-of-school youth, 415; work-study programs, 415
Vocational information, sources of: 303
Voice disorders: 59

Women's career development: 302
Work, meaning of: 301
